MAHI JAWLE

B.Tech Electronics & Communication Engineering (AI/ML)
MIT World Peace University, Pune | 2024–2028
Pune, Maharashtra, India | [8983309714] | [mahijawle327@gmail.com]
[https://www.linkedin.com/in/mahi-jawle-5b03342b8]

SUMMARY

B.Tech ECE (AI/ML) student with **8.9 CGPA** and hands-on experience in **Python, C/C++, SQL, machine learning, embedded systems, and hardware prototyping**. Interested in AI/ML, software development, data, and technology-driven problem solving.

EDUCATION

MIT World Peace University, Pune
B.Tech — Electronics & Communication Engineering (AI/ML) | **2024–2028**
CGPA: 8.9/10

The Orbis School, Pune
Class XI–XII | **2022–2024**
89%

TECHNICAL SKILLS

Programming: C, C++, Python, SQL
AI/ML: Machine Learning, Regression, PCA, LDA, SVD, OpenCV, AI Search Algorithms
Databases: MySQL, MySQL Workbench, SQL, ER Modeling
Embedded: Arduino, ESP32, C8051F340, Embedded C, Sensors, OLED, ADC, PWM, UART, SPI, I2C
Tools: Git/GitHub, Google Colab, MATLAB, Simulink

PROJECTS

Digital Stethoscope

ESP32 | Piezo Disc | OLED

- Built a digital stethoscope prototype using an **ESP32 and piezoelectric disc** to capture body sound signals.
- Integrated an **OLED display** for real-time system output and sensor interfacing.

Hand Gesture Detection

Python | OpenCV | Arduino

- Developed a hand-gesture detection system using **Python and OpenCV** to recognize hand movements.
- Integrated gesture recognition with **Arduino** for hardware-based interaction and control.

Keypad-Based Password Door Lock

C8051F340 | Embedded C | Keypad

- Developed a password-based door-lock system using the **C8051F340 microcontroller and keypad**.
- Implemented password authentication and microcontroller-based locking control.

Blood Bank Management System

Python | Google Colab | Data Analysis

- Developed a system for **blood availability management and location-based blood bank discovery**.
- Explored OpenStreetMap integration and ML-based analysis for blood demand and availability.

Pet Adoption Management System

MySQL | SQL | Database Design | AI/Search

- Designed a centralized platform for **pet adoption, shelter management, applications, and medical records**.
- Applied ER modeling, keys, relationships, constraints, and SQL queries.

MediNova — Healthcare Platform

HealthTech | Database | Web Application

- Designed a healthcare platform supporting **doctor availability, appointment booking, and real-time queue tracking**.
- Focused on improving patient access and reducing waiting times.

Moisture Sensor Detector

Arduino | Moisture Sensor

- Built an Arduino-based system to **detect and monitor moisture levels**.
- Implemented sensor interfacing and programmed the microcontroller to process readings.

CERTIFICATIONS

- **MATLAB** — Certificate of Completion
- **Simulink** — Certificate of Completion
- **Prompt Engineering** — Certificate of Completion
- **Signal Processing** — Certificate of Completion
- **Optimization Techniques** — Certificate of Completion

HACKATHONS & ACTIVITIES

Smart India Hackathon (SIH)

- Participated in **Smart India Hackathon** as part of a team, working on technology-based problem solving and solution development.
- Gained experience in **ideation, collaborative problem solving, rapid prototyping, and presenting technical solutions**.

RELEVANT COURSEWORK

AI/ML: Machine Learning, Regression, PCA, LDA, SVD, Search Algorithms
DBMS: SQL, MySQL, ER Diagrams, Joins, Keys, Constraints
DSP: DFT, IDFT, Convolution, FFT, MATLAB/Simulink
Embedded Systems: Microcontrollers, Embedded C, ADC, PWM, UART, SPI, I2C

PROBLEM SOLVING

- Practicing **Data Structures & Algorithms** using C++ and Python.
- Familiar with **BFS, DFS, DLS, IDS, heuristics, hashing, searching, and complexity analysis**.

AREAS OF INTEREST

Artificial Intelligence & Machine Learning | Software Development | Data & Analytics | Embedded Systems & IoT | Technology Consulting

---

Expected Graduation: 2028 | **Class XII:** 89%
