EDUCATIONS

MIT-WPU 2024

B.Tech *CGPA : 8.14/10*

- **B.Tech**, **MIT-WPU**, **8.14/10**

VVPN 2023

HSC (Science) *CGPA : 77%*

- **HSC (Science)**, **VVPN**, **77%**

PROJECTS

Automatic LPG Cylinder Booking & Alert System

- Developed an **Automatic LPG Cylinder Booking & Alert System** using **HX711 load cell** and **Arduino** to **monitor gas levels** in real time. The system triggers alerts when the weight drops below a threshold, enabling timely cylinder booking.

Technologies / Tools Used : *HX711 load cell, Arduino*

Gesture Control Using Arduino

- A gesture-based control system designed using **Arduino** and motion sensors to detect hand movements. The detected gestures are mapped to operate devices wirelessly, enabling smooth touch-free control.

Technologies / Tools Used : *Arduino*

NeuroWatt

- **NeuroWatt** is an **AI-powered energy optimization system** that intelligently monitors and controls industrial machines to **reduce energy consumption**.

SKILLS

Databases :	MySQL, PostgreSQL, MongoDB
Frameworks & Libraries :	OpenCV, React, FastAPI, Node.js
Languages :	English, Hindi
Programming Languages :	Python, C++
Soft Skills :	Adaptability, Decision Making, Critical Thinking
Tools & Platforms :	MATLAB, PyCharm, Arduino IDE, VS Code

AWARDS & ACHIEVEMENTS

- **Volunteer Appreciation** – HSW Tech Event
- Cleared the internal round by developing an innovative robotics/automation concept under the **Mitsubishi Electric Cup** (Internal Round), **MIT-WPU**.
- Academic Performance Appreciation Scheme (APAS) 2026

POSITIONS OF RESPONSIBILITY

Event Volunteer

HSW Tech Event

- **Project Lead** – Automatic LPG Booking & Alert System
- **Volunteer** – Report Writing Team, RIDE Event (MIT-WPU) (Contributed to drafting, organizing, and finalizing event reports for clear and effective documentation.)
